

Snafelt Wood Farm

Oct. 5th 94

Acc. 1443

Dearest Mother,

I have had
you much in thought these last
days, & hope that seas last on
with you is not as cold, & stormy
& restless, as evette us, for it must
make the very thought of the sea
desireal - I do hope that
your recent readjustment,
will mean increased comfort
& peace of mind for you - Two
days ago I was inclined to urge
you to come out here for a little
quiet - & to enjoy the glories of the
autumn in the mountains -
but this adverse weather makes
me a little doubtful as to the
pleasure of it - I am hoping
that Rankine will turn up next

week, & that we shall get over
to Saranac. I have read two
papers lately on the treatment of
lung diseases, that make me feel
that Eric has had no treatment at
all, & that our doctors are ap-
parently ignorant of the special
treatments now used - they try
apparently with good effect several
things such as massage, stimulents
& cold applications to relieve pain
which I have myself suggested to
both Drs. Dr. Washburn, & they
thought nothing of - The diet seems
to receive great & scientific attention
while I was directed to use no res-
triction - I cannot do these things
without skilled directions - but
most interesting paper ever by
Dr. Karl Von Kuch - at Asheville
who apparently superintends a
sanitarium called the "Wingeh"
Do you know anything about it?

I wd be greatly obliged if you wd write & ask
Dr Von R. pathologist, as to case in familialism
whether he has patients residing in the north
westward, see etc. - Unless Colorado is very
thoroughly recommended, as various therapeutics
as identical results - at the moment - feel indisposed
& prefer Adelaide - a more comfortable climate
not quite so far away - My opinion is that you
in case where the trouble has been obscure
only, & patients can very well see, that case
troubles - with of which more length than
the process quell of air, proceed to is now &
might enough to be sent to St. Louis - Perhaps you
might also ask Dr Von R. for some of his cases
on hemorrhagic troubles - See my list - near bottom
this - as I cannot write to him now - My opinion
might also say that experience is an obvious fact,
that these are merely troubles of the same kind as
familialism, also of I to be obscured to see in
the familialism of all sorts as many think in some of the
modern as with great care but think it is the same as
