Dearest Mother,

I have tried to write a line for several days back but - not successful. Your letter arrived this morning, I am glad to hear continual good accounts of you, though it does seem a pity that you should not see a little more of friends while you are there. I should think you might give a few days to see after the work is over, but I had a note from Har - this A. M. saying that she & Will. intended to come down Wednesday & she to stay till Saturday & she a few days longer. I had offered to take them if it was of any service - but not

Wells have just had clucked
that I could not like to risk
that though only 3 of our party
have not had it.

The Carey-Wilsons have
regain stock with them. The
is here to make more interest
& more definite cooperation
with of the Eng. Ch. people here
with the Ch. Soc. Miss. Soc.
The Episcopal fold has
had a very unusual raising
up with her either of part
of her stock. The mis-
sionary efforts of our day are
every remarkable & as her
a said, he thought the question
were, "What can she ask
not." What reasons are there
that I sh^d be a missionary
but? What reasons can I give
that I sh^d not be a missionary
I perceive the next 20 years will
see as much more wonder-
ful development in that
line, as the last 20 & that
once more the "Mission Church"
will be resolved into mis-
sionary societies, at work--

It is really the only logical reason for a
church - as far as its edification is the
teaching, governing, & improving influences
are to that end - & no wonder no man
are confused, when there is no reward for
so noble an aspiration - but it is having
a tea tomorrow, & wants help to keep
of course I would get "best" & ultimately
I am not going to tea myself, so I am
staying at home & glad to be able to
wonder that it is not as an intelligent
mind that is told it is as a house
might - have a tea at home = a lecture
on stock is to have meetings through the
week - the day is very well & so many
things kept within of advice - I was
or know so on that I can see
non-sense - but may be & certainly

the is very poor almost for being the child
had never had a conversation before when
well & strong the last day when I took
him & he with = last - at 9' right as usual
at 8 & 9 - took the conclusion of night news
regained consciousness - dying at midnight
I can afford hope has no sects
give the papers information about in
accuse has there has been no letter
notice when I there is when people
tell me what are interests they are
concerning there is other people
Allypud that has success of
Wells and I hope & young
Acme
