

Mr. Crow

Acc. 1377

STONELEIGH,

ROCK FERRY.

My dear Cousin

I have been thinking
much of you all lately,
& of the anxious, painful
anxiety you must have
had, with the sickness
& disturbances in the
city. I hope the worst is
over now, & that you
have not had any pulmonary
cause for anxiety before
going further, will you
kindly thank your father

for the book sent by the
Tract Society from him,
I have read it with a
great deal of interest,
all the more from having
seen over a little of the
ground myself. We are all
again at home, & as our
fine weather has deserted
us, it is well that our win-
ter season of lectures,
concerts &c. had begun.
We seem to be in November.
I suppose you have heard
that Peter & Kelly are

Maunt. Kelly's health was
so bad, that it was uncer-
tain up to the very day
whether the ceremony would
take place, it was not prob-
able being hurriedly on
Sept. 10th but they have
not yet returned to
England but are waiting
for her to gain strength.
I dare say in time she will
be strong & well for yet.
Mrs Scott I am sorry to say
is not very well. Her asthma
& her deafness has increased
but we hope that when
her cold entirely leaves her,
her hearing will improve.

It is a very good trial to see
at conversation was one of
her greatest pleasures.

We are all very much pleased
at the prospect of seeing
some of you next summer.
I hope that you will both
come over. We have had
several congratulations
on Sir William's being
President of the B. Association
I think the greatest honour
is in his being the first
Baronial President.
The Madams are all well.
Catherine has just gone on
to spend a few weeks
with Madame de la, as

She is expecting early
in December, and is very
nervous on account of
her former miscarriage. You
know this is the fourth
time, & it seems such
a short time since she
was married. I am
thankful to say that
we are all well &
free from colds. The
girls are very busy at
present, and send their
love to you all. We
have heard nothing of
Rauhin since he left

for Australia. You will
now be enjoying the
beauties of an extreme foliage
of probably Indian summer
I am convinced of that,
by looking up your very
writing, at our other sunset
Masters. I have at last
learned to admire even
them when the sun shines
& lights them up. Please
renew me kindly to Dr
& Mrs Harrington, with love
to you all believe me
Your affectionate Cousin

James Brown
