We are <sup>May 5.</sup>

now in the state of Nebraska, & a wonderful state it is; nothing but prairies, flat, & toward the W. end very dry. We had our breakfast this morn. Before break. we saw some antelope, not very far from the track. They did not seem to be much disturbed but took it quite philosophically. Yesterday we saw quite a number prairie hens. Large herds of cattle are kept on these plains. Every here & there as you pass along you see a number, sometimes with 1 or 2 men
