

Bernard had with Anna Birkenbato,
 Children at Melis Little Metis.
 Conrad taking responsibility

July 9./94

Dear Anna,

Before this reaches
 you I hope your husband
 will be with you, to
 take some part of your
 care respecting dear Sue.
 I sent a letter to meet
 him in New York, which
 I hope he received. The
 principal suggestion in it
 was that it might
 be well to consult
 some experienced physician
 as to Sue's case, never
 that he has had more
 than of abundant air.

I do not know of there
is any reliable man
available; but any one
having experience of patients
in that region might think
of things which would
not occur to you or to
a Montreal physician.
— Perhaps more move
to a greater altitude or
to some other region.

Here all matters are
as usual. All seem to
be in good health; but
no doubt the children
and especially the boys
seemed to be happier &
Remond or you were with

them. Grandmother and
I give them as much
attention as we can
but they are so active
and full of life that
we are naturally too
slow for them. They are
however I think very
good, and Conrad
seems to feel that
some responsibility in
the family rests on
him.

I shall enclose with
this a memo for
Dr Harrington in case
he should stay over

in Montreal, on his
way here.

May our Heavenly
Father and his good
Spirit guide all your
counsel, and give
you all knowledge
and sound judge-
ment.

Love to you, Bernard
Oliver. Ever yours

Wm Dawson
