

Letter
to Semmes

1901

Montreal

May 3^d 1901

Dearest Anna,

Yesterday I had
the Childs in for a
cup of tea at the
laboratory. Roy came
with them and brought
in Sir William Macle
who seemed to be in
very good spirits.

He was greatly pleased
with the engravings
all of which are now
framed. The finale
at the cooking school

took place to-day and
the children came
home well pleased
with the proceedings.

Clara went down &
partook of various deli-
cacies which spoiled
her dinner appetite.

This has been a bright
sunshiny day, but
rather cold & windy.

Still, the leaves are
coming out quite rapidly.
In a few days I must
send seeds to Paris.

The Watters, Moyses and
MacBride left for

England to-day and
the stentings have moved
into the Waltons house.

I hope you are both
enjoying Lennoxville
and getting some benefit
from the quiet and
the country air. We
are not expecting you
back until week and
everything is going on
smoothly here. We
have heard nothing further
from Bernard, but possibly
he has written to you.
I suppose you will be
wanting to send him to
Lennoxville next year.

Con. seems to be working
hard now and McClary
says that he is doing well
with his mathematics.

Your loving Bernard

I see by the Star to-night
that Lady Dawson and
Mrs Harrington have re-
turned to town from
Sherbrooke.
