

Sunday -

Dearest Mother,

Grandma had  
 a very good night,  
 the best night she  
 has had since the ill-  
 ness began. The little  
 nurse thought - Tem-  
 perature normal,  
 pulse 100, respiration  
 good - She slept  
 until 2:00 clock without  
 morphia, then began  
 to be restless & was

gives morphine & was  
quiet until morning.  
She takes her milk  
& chicken broth as  
after as wanted, &  
The J. said she could  
have some fish if  
she wanted today -  
It was a trying  
morning for the  
tube had to be  
taken out & cleared,  
& the wound dressed,  
but J. H. stood it

well, only seemed  
very, very tired  
afterwards. Now  
there is nothing  
more to trouble  
her about today  
& she can rest  
quietly which is all  
she wants, she  
says - The Prince  
from Japan is here  
today - I met Dr.  
Peterson. Trottling about

with some Japanese  
whether the price  
or the doctor I do  
not know. They  
were looking over  
the hospital -

There is quite an  
electrical display  
at Haverscray -

Much love  
from Clara
