

220 Argyle Avenue
Ottawa May 30th 1908.

My Dear Dr. Adams

In reply to your letter of the 13th inst I beg to enclose my cheque for \$25⁰⁰/₁₀₀. In doing so I would like to express my keen appreciation of your kindness in bringing this matter to my attention and thus affording me an opportunity of expressing in some such feeble way my deep and abiding love and admiration for one of the most learned & devoted of McGill's professors.

During my college course and on many occasions since that time I have had the advantage of intimate intercourse with Dr. Harrington and the student's respect for the superior wisdom of the unselfish teacher deepened into the very sincere friendship and affection of later years. His enthusiasm and interest did much to direct my studies and attention to Zoology and Geology and my success which I may have achieved since my graduation was very largely the direct result of Dr. Harrington's teaching. We all mourn in common his early taking away from the scene of his loved labours but his work must have been finished else he would have been allowed to remain. We all feel sure that the presence of his portrait in some conspicuous place will do much to influence later McGill students to more earnest & persistent effort. Again thanking you I remain
Yours very truly
A. E. Parlow
