Dear Mr. Hamilton:-

I have to thank you for your letter of April 9th, which I received yesterday, and for the subscriptions to the fund for Dr. Harrington's portrait on the part of yourself and your two brothers.

McGillivray -

I have also written to a few other graduates from whom I have not as yet had time to receive replies. These reside in Australia, China and Africa.

Letters were also written to J. S. R. Green, Hugh Donaldson, R. F. Taylor and George P. Sharpe. These have evidently changed their addresses as the letters were returned to me.

If all the subscriptions which are now promised are paid up, we still need \$115.00. I think, therefore, that there will be no necessity for asking anyone now for subscriptions of over \$10.00, and I think there is but little doubt that the sum now required can be obtained from graduates who have not as yet been approached.

I am enclosing letters to some half dozen graduates in Mining and Chemistry who are resident in the Western United States, which letters might be sent out signed by both of us, and I have accordingly signed my name to each, leaving a blank space for yours. I think it quite possible that some of these men have changed their addresses, those which I have placed upon the letters being obtained from the last List of Graduates. If these addresses have been changed, I should be obliged if you would run your pen through them and put on the new ad-

dresses, if you are acquainted with these, and forward the letters.

You may possibly meet other graduates who may desire to join us, and if so, you might approach them directly.

I think within the next month or two the fund should be completed.

I may say that all the responses which I have received have been of the most enthusiastic kind and in several cases contributors have offered to subscribe additional amounts if we wish them to do so.

With very best wishes, I remain,

Yours very sincerely,

Letters to the following enclosed with this:-

H. Yelverton Russel
