

Montreal.

Nov. 11th 1870.

My dear Berrie,

I have been making up your parcel of winter garments, which I think I will have an opportunity of sending in a few days. I did not put in your winter cap as it needs remodelling and it seems to me you said you did not require it. If you do, write & say so and tell me how you would like it.

fixed, in the most approved style, I suppose?

I am still in town and likely to be for some time yet as Cecilia is not to be married till the first week in December. If you go home at Texas we may go up at the same time. I wish Mary could come down for it must be dull for her there.

Everyone has been very much shocked here by the sudden death of Mr Warner, he was only ill a few days and then not considered dangerously

So - The family are sadly
afflicted, especially poor
Louisa, she is so delicate
and now has no father
or mother to look to -

I send you a paper
announcing the death
of young Mr Hartley
with whom I think
you were acquainted.
It is so hard to under-
stand why a promising
man is thus called away.
Wasn't there something I
said about Mr Hart
wanting you to assist
in some way - perhaps if
you apply in time there
would be an opening, if
you think so, don't delay.
You mustn't consider
me meddling, only

interested —

Your questions about the Governor were hardly in my limited line of knowledge, but I made enquiries and know now that he has a veto and can prevent a bill being passed for two years & then it is referred and left to the decision of the home government. The length of his appointment is also at the will of the Sovereign, not for any fixed period, Governor Monk was here for eight years — The present Governor has vetoed two bills, one divorce and one curtailing his salary — which of course he would be likely to

No — I am afraid I have
not expressed what you
want to know, very lucidly,
if not, ask again and
I will try again —

I was glad to hear of
the safe arrival of the
"Prussian" at Liverpool
on Tuesday morning — by
this time Miss Kottungham
is probably with the
"Gales" of

I heard of you yesterday
through Maria Atravati
for she had just received
a letter from Maggie Mary-
man, in which she
spoke of having, at last,
met you, & of your politeness
in taking them through
the Scientific School —

Mrs Atwater has been quite
poorly for some time &
I think the family seem
anxious about her, she
has a cough and symp-
toms of pleurisy &

This is the third letter
I have written to-day
so as usual excuse
scribbling - Auntie Brum
is sitting near me &
sends love and
accept lots from
your loving
sister

Charlotte.
