May 16, 1872

I have much pleasure in stating that Mr Bernard J. Harrington, B.A. of McGill Col, and Ph. D. of Yale Col, has been known to me for several years, as a student in this University, and at the Sheffield Scientific School, and more recently as Lecturer in Assaying & in Chemistry in the Department of Practical Science in the University, & that I have the highest opinion of his personal character and of his practical knowledge of Chemistry, Mineralogy & geology.

I may add that Dr Harrington took the Logan Medal in Natural Science in this University, and that in the past summer he acted with much efficiency as my assistant in a geological exploration of Pineau Edward Island, and in making analyses of the minerals collected in the course of our journey. I can with

the utmost confidence recommend
Dr Harrington for the employment
which he desires in connection with
the geological survey of Canada

J. W. Dawson LL.D. F.R.S.
Principal of
Mc Gill University.
