

We have had capital news<sup>2</sup>  
tonight William has got  
a "Millar prize" for his  
paper sent in to the Eng-  
society of engineers & is a  
year for "three years, is  
not that galacticos?" as I like  
w<sup>d</sup> say -

have I always begun these  
letters, thinking I will write  
a very short one & go on to  
other letters that I have  
but - am beguiled on I on  
by the happiness of we  
sending words to my absent  
husband -

Does Nellie still stay in  
town with her baby? The  
rain must have been a  
great refreshment to you all  
particularly to the boys &  
sweet -

Here an invasion of insects  
has occurred, & the threat of

of my narrative being thus  
brusely broken, I will not  
strive to piece it - -

By the way dear, I very  
often send you letters with-  
out reading them over, so  
you must put in stops &  
fill up vacancies where  
so required. I am sure you  
will always divine what  
I wd say -

You must not do any  
work when down here. I  
want to have you spend  
whole mornings with me &  
the "Japanese" - -

With all love

Anna -
