

M. Gill College.
Montreal.

Saturday

Dear Mr. Huntington,

Your letter of
Thursday was a very pleasant
one, as it gave some
assurance that your pecu-
liary difficulties of a
past settlement are getting
over. Quite new mere
to mention two or three little
matters that have
turned up since you
left. One, and I suppose
you a very important one,
is to say to know that

a certain volume (I think
there is the end) was
delivered too late for
me, and will be
sent by post afterwards.
Another is that Mr
Bayne will hand
me your monthly cheque
on Monday, and I shall
deal with it as
you may direct,
He is drawing before
the end of the month.

To accommodate Prof
Leaving town.

I give you know's
advice respecting case,
He seems to think the
swelling is merely a
matter of patience
and care. The general
health to be kept up,
and the swelling to
be kept if possible
from coming to a
head. He said he
had given you medicine,

June 1883
Dr. Dawson

Looked for you I think,
what was to be
kept up. I should
think an important
thing will be to
avoid custodians &
to give nourishing diet
and fresh air &
avoid any chills.

If anything is to be
done for our people, please
attend to it and send
me the bills. I am getting
weedy as done in your
garden here.

With all love, and
hoping you are all now together
in comfort,
Yours sincerely
J. Dawson
