

Wednesday

Dearest Bernard,

Papa has arrived looking none the better for his struggles in Montreal & pneumonia. He hopes to keep him till Monday for a little rest. He is much impressed with the improvements in health. I did not think the place could have been so capacious. Eric went up to the station with Sam, & seemed to enjoy it. I was very irate to find Papa had brought about half a bushel of most lovely peach apples - in a hopelessly green state, & to be told that George had picked the whole crop & deposited the rest - I don't know where - such an idiotical thing to do, if any apples were fit to pick now. Please assure him we

w^d prefer to appreciate our own
days for such deeds

Did you take the books
bill with you? I wanted to
look it over one time the car
act out - 45^{cts} I certainly paid
for - & I wanted to be sure of
the rest - Better send it back
to me with money to pay it -
I have not got pages yet -

I cannot remember
whether I left our bed at
home, made up or not I hope
so, as it - w^d be most dismal
to have to do so far & myself
I left - towels bed linen etc
in the lowest - drawer in
the hall, chest of drawers
wh - may be there, or in Eric's
new room - the sheets &
things in the nursery cupboard
were only put there in case
of need.

Two or three "Stars" arrived
last night - with a good cut
of paper in them, & a long life
which I have not yet read
Another is to appear in the
gazette when the title is an-
nounced, paper was correcting
the proof of it - Bonny seems

to have journal that contains but some ideas
witht considering, I to have pickel some of his
epitham English presents in consequence
The weather here continues fine I very warm
wt. makes me hope that you may have a
cooler time above, it- but be a pity that you
shd go back to ~~journal~~ temperature

I am hoping to hear from you
tomight, mother had a letter from Florence
in wht she said she & W. were going to the
college to welcome you at breakfast, so you
must have had quite a pretty party. I'll
one wht at- you think of the company, during
at- the College - I year & without much
trouble what not a small matter of making
with I wd be very much obliged at any time
I find I have several sets of things that will
be hard to collect - I wish of our deliver to
write - with all love affectionately Anne
