Imagine that
this ought to be in time to
reach you just before you
leave England, & that perhaps
you will feel a little blue
at making the change of
from English to foreign
lands. Once there I am sure
you will have full oc-
cupation & interest. I will
look eagerly for views from
London & once the chain of
communication is fairly
established, your far
awayness will not seem
so great. Our plans are
somewhat remodelled now
as Tom has received several
orders to go up to the Lake
Superior region for some

work wh. will probably oc-
cupy 3 or four weeks, as usual
his orders are very vague &
his work - the time etc very
uncertain, however he goes
tomorrow morning & F. will
come down to meet the fol-
lowing Monday - & if the hour
be in order go to Mother's
In a way that suits none
of us so well but it can't
be helped & it will be a
great concern & a capital
health arrangement for F.

I shall be very busy all
this week - & I fear various
scouts I had intended to go
upon with regard to education
will be left out, far more
pressing than any manner neces-
sities - but I will at least
pass myself of addresses so
that I may write from Paris
if need be - papa strongly
advises the governors please &
certainly the expense is the
main hindrance to that in
my mind - still it is not
needful to worry you about
it.

Boysie continues very sweet &
good, but as early a riser
as rather wakes as ever, &

has these contents to compare of her
with I am going to take her to Shewell
tomorrow. Shewell seems to me quite different
from over - work & headache. I do not
get me suitable remarks out of him
when after 4 weeks saw him. The
feels are going to meet & are agitating to
get - a Dr. as Drs to be there all summer
in cot. I hope they will recover as it
will make us all more comfortable about
contingencies - No. 1. Hooparts have taken
the \$ agrees how I will be pleased to
people with one boy quite suitable
as a companion for Eric. I would
get passed all other cases with the
Richard & if it not be right to do so?
