

Will you please mail me one of the Arithmetical books that the couple of pictures, but the other I think it is in the lesson table drawer, if not in the book shelves, green covers - If you see Dr. Howard I wish you ask him about my back it bothers me so here where everything the acts or is hard to secure hair like a thorn or a stiff rheumatic pain after being at home for six weeks I have ears & stuff far & away whole day at times, it's only last a short time after sitting still. I wish to no consequence if they answer me but I always insist on a relation about the spine - if swelling or other do it close - I want to marry abt. 15 - 16 years.

June 23/87

Letter received tonight - was the only fruit of the mail for our two hours by the way I have not seen a paper since I left. It is not be worth while to have the Witness ordered or gazette sent on as you are not having it - I feel really quite hopeful about your father for if the really alarming symptoms have abated weakness even the most profound, may be built up to life again - I suppose from what you say that he refuses to take beef tea - have you tried calf's foot jelly - cold as not a powerful is of value, also use not some of these "classical foods," which are peptonized or haematoxylic preparations.

many other patients

be useful, they might be or-
dered as medicines & given in
spoonfuls, if desirable - I
wrote you one letter to town
thinking you wd be there, so
doubt paper wd send it - or if
you were not - Keenkin now
is not expected in Montreal
till Friday of this week, having
sailed from Glasgow in an
Allan liner - I fancy he will
stay in town & come down
with paper about the 12th we
have not yet seen "Cassius
Craw" either, so changeable
are the sterner sea -

I received the photos - which are
capital as to likeness but had
they all little spots about
the background when you
got them they look like
little reddish places & certainly
if so sent from the photog^{rapher}
are not as they sh^d be - Will
you send one to "Uncle
Eric" - & Mr. Libb^{er} & I will
send one to Maggie Fortin &
the others can wait till we
are together again
If wd delight you to see

them & tell me they all begin to look so bright
& ripe with low leaves - leaves looking just a
little red & low is a beautiful red - leaves
overl - he has improved mind, & think
the cats better but is too thin & very pale
leaves appeared - pale, & grass just through the
sometimes no red & eggs & more I wish - brown
well & at - leaves leaves is if - not cold - he has
had a well along today. I see permission as
as full as their infirmities permit - while the
leaves & leaves brown leaves & leaves to grow, I
hope to hear they will all die - it is not cold
& the situation of the leaves leaves is quite
a relief - leaves like baby is as well as me, I
quite comfortable in always looks to me as if
even trying to have to understand his place. I
think - He has more of the plethoric or cerebral
look some baby's face - he gets a salt-water
sure looking his two ears like a mouse
his house begins leaves - I hope with

you will - it is rather a pull - I only have
a little more space for it - I do not enjoy it so much
as I do when I write a dissertation to me I do
like to do all the writing though I do not
of a sentence, rather, however, I have always
of - after a bit - I find all the children
hope of an wonderfully well, but I do not
the of a part of - these words I do not
writing I find - writing so well in his hands,
that - is what I am trying to get - I
I was here what - you say all the
up that you have taken as much as I can
of the case you take as much as I can
as many days I have to the effect of
I am very much as I do in any one
as this kind - work is - I do not
I know is especially trying to you -
I have a difficulty in the matter -
does take a few days to take the
most of some one to take the
is required to give you now that
I feel to be a very good thing - he has
and understand the nature of the
with some time
