

Little Notes  
Sunday 29 -  
July 27/88

Dearest's -

We have had a very warm close day - thunder-showers threatening all day but they have rolled away now & left still the oppressive feeling of thundery weather. I am not fit to live in the world on such a day. Mr. Dizon Hague has had an outdoor service, & all the young ones, went to bed early in the hope of being called up to see the eclipse - The moon looks beautiful now at 10 P.M. & shows no sign of diminution or extinction.

I will try & take a look  
at the book you sent - tho'  
I really have given up  
trying to read on my own  
account. & I am very  
much prejudiced against  
Math-a - & have a very  
poor opinion of his wit  
or wisdom -

What a desperately  
long journey you have  
gone, it seems all going  
on - I suppose you shall  
hear of your being there  
in a day or two - I have  
heard that quite lately  
the fare for the trip across  
was changed from 100.  
to 150. I hope that  
that - did not take effect  
before you left as it -  
certainly makes a great  
difference to travellers.  
Ever seems to have  
had a very jolly time in

Walden, & paper reports a good  
meeting at 11. Paper - after along was  
was's historyology & I went - over to the,  
within are good printed, the 4. Walden  
children appeared, Keith, with a long  
wreck of paper, base, with a little  
present of salts, with a loaded - from  
more was a la. other, & Eric, with a  
bagout, they all behaved very nicely  
& were refreshed with a piece of cake  
& retired to their respective beds.  
I think the press will be  
ready to pick on herology, we have  
had abundance of suggestions on paper  
has had several packets sent - down,  
and several boxes of printed - or still printing

up with good things - I'd wish  
like to have in them fruit again &  
need in fruit - there is nothing in  
them and otherwise I must I suppose

The place begins to look over  
though I don't think either hot or  
fugle - The views I get are here, the  
Bucklers - I gave notherton from  
Colorado he does not - look over  
changed - I has not a general view  
possibly - he has left some specimens for  
me at the College he says -

Monday

Eric got up about 11 1/2 days  
up till 12 afternoon all the papers of the  
college - Class & South were collecting with  
a short book - I was occupied to find

this morning that Edith  
did not remember being  
up, at all.

Her letter paper  
seems quite exhausted -  
I must try & see what  
she likes has on hand  
Loveral has just come  
in, & I asked him if he  
had any message for  
you - he considered sleep-  
ily for a moment, & then  
said "I will say - Dear  
father, when are you  
coming down"

I enclose a letter  
that Ruth has been writing  
& I fear it will never  
get to you if I wait till  
she finishes it -

The strawberries are  
nearly over - as usual  
the children cease picking  
directly the great abundance  
is past - I have not yet

seen Raspberries -

I am hoping for  
more cheerful news from  
you - I trust - that you  
will not find yourself  
involved in perplexities

All send love  
but are too busy to write

With all love

Anna -
