Dearest Love,

I hope your
not-telegraphing, does not
mean that you are still
suffering acquire from that
tooth - I will be so relieved
to hear that that is past
& you are able to take
all the benefit out of this
long-talked-of trip.

I went to the nursing
meeting & saw some 36
very healthy, rosy, good-looking
nurses - prettily attired in
pink dresses, white caps &
aprons, & their staccato voices
we heard a short statement
from Mr Sterling a very long
long speech fr. Dr. Van Colledge

a pleasant one from the
Gov. Genl. & a charming, well
awake well-put one from
Dr. Crick - I walked up
with Mr W. C. McD. but
fear that I did not im-
prove the occasion. I was
afraid of saying something
mal-a-propos. I said nothing
but talk, which perhaps
was best in any case.

Hapa is to have a
meeting with Coe, & Dr. J.
to settle their positions.
I pity him - it will be a
trying one I sh^d think -

Take care of yourself
dear, we miss you very
much - even Breecies
has mastered the situation
& says you have gone
"too-tas" - A mild day
has enabled all to go out
& I trust we may continue
this - I am thinking of

going to town again tomorrow I think
if I do I will settle myself of the way
ing - I begie to see my dear thought
I hope you will write when you see
your father - I have done - a short
letter for you with. I shall leave it
before reaching you to post this -

A note from Brown M. A. - I don't say
I have written to him to long to see
you to send I that I could like the
prospect - one sent to me I very well
that send his hat - I - with letters
will that be right - Has - several
happily so I will have to send
found all - them, I will ask you
in and kindly send the big too, also all

whether if Bacon has not moved - I thought
perhaps this will be right - I thought
with these you should

Bacon says he is
going to sell / 01, paper
I hope the rest to Spring
I suppose he means 10 -
