Little Metis.

July 1<sup>st</sup>  
1891

Dearest Bernard,

Papa arrived  
safely last night - shortly after  
11<sup>o</sup> of the latter east-ward  
still holding - Today however  
looks settled & much warmer  
so our discomfort & the country  
hope of rain is ended together.

The St Andrews dishes are in  
the cupboard over the deer  
water -

I am sorry about the latter  
but if Braconer w<sup>d</sup> put the  
summer better in large tubs  
50, or better <sup>& mark when left in penitential</sup> 60 lbs I keep carefully  
you w<sup>d</sup> probably sell it - better  
in a lot in fall - & I w<sup>d</sup> my-  
self take a large tub. & mother  
another - Clarence probably another  
if a reasonable price say 14<sup>cts</sup> or  
18<sup>cts</sup> more than Lamb w<sup>d</sup> give.  
Besides if the cost go up why  
not get the Braconer to create  
your with what they use at  
the usual 20<sup>cts</sup> a lot you will

penet he sells an increasing  
quantity in that way, I sh<sup>d</sup>  
not take all that to himself  
I tell you - to be sold at a  
much lower rate - 6 or 8  
better tools are in our hands  
all cleaned & inside one  
another the kids together ready  
for shipment if chance occurs

I am glad you went to  
the Mr D's Fleet was assured  
me only yesterday that he liked  
your handling was assured  
& that Mr D - had a strong  
personal regard for you, that  
expressed his appreciation of  
your difficult-position, &  
said you were entirely  
handicapped by paper -

Have got the money & the  
other things in due course  
as usual short of time -  
Take care of yourself don't  
don't decline too many in-  
vitations -

Love  
Anna
