

Little Lutes  
July 20<sup>th</sup> / 91

Dearest - B -

I wd have written  
to you yesterday, but - spent  
a good part of the day in bed  
in the hope of avoiding such  
a hard time as I had when  
I came down - I thought I have  
been stupid enough today,  
think I shall get on fairly  
well now - Mr Taylor is there  
as you know & Florence had  
small party at her house last  
night - Among others Mr Harris  
the Prof. at Kingston - I have not  
seen him for a long while &  
wish I had seen him again  
he is such an odd man! I am  
enthusiastic admirer of the  
salvation army - He has a large  
farm at Batturst, which he  
cannot very well pay for a  
long while - but - he is doing  
sublimely well with having  
turned it into a hop farm!

I think he saved 400 acres in  
Hops & at the lowest computation  
he expects to make \$1500. in this  
year out of it -!!!! There is an  
ingenious part of it - he trusts to  
artificial manures as fertilizer  
& has some ingenious invention  
by wh. he waters the fertilizer  
down to the roots of the plant  
He had 80 girls picking last year  
& built shanties for those who  
came from a distance.

We have not a hymn book  
here which is a great fault -  
that I really shd have seen to  
earlier had I not been stupid  
& as 3 of Moody's & Leunks, &  
those ones wd be used to have in  
church wd be very acceptable  
Mademoiselle seems to be  
second & really it was too hard  
of me not to have sent up  
you such an easy thing soon  
If you see one of the baby  
pawlets here & puff in the  
nursery please bring it but  
don't bother about a new  
one - several of pawlets show  
among me. I should to frequent  
small disasters - you will  
find baby greatly altered  
& grown & improved - Lois is  
not nearly as happy with Ellen

as with Kate, but - she is flourishing all the  
same - & talking wonderfully well upon all  
subjects - Papa's remarks seem all right as  
under & least - I did not mean that getting  
the Helgheim progress article is a sort of sup-  
perior - but - I shall try & be careful of it  
The Capt - evening & reading - but - I hope you  
will have more as that always go by - I send  
three stories - my Germany Aboriginal & how  
read me to the children ever and conclude  
to be interested - Today has been however  
but - the afternoon but - beautiful picture  
& but - above like retinal weather  
the sub even as that for work but the  
part of his hand in our superior language  
& it - is very difficult to find the idea is so that  
& quite prevalent his saying or language - showing  
as always any thing of accord which is a fact  
I think that what had had a little but with  
to keep the copy together, though the records

clear enough I not - regretting at all  
my Elliott had undertaken to contact him  
to this article I was very glad of that as  
is just a hope to -

I am hoping that you will get  
across this week I take a real holiday, have  
gone any intention of bringing down a camera  
as you spoke of if you only take some or  
preferred photos you as not - have any thing  
and paid as very little - I hear that the  
and still exactly. I hope you had a pleasant  
and to the girls - I hope you are all well  
they over of Sunday those - and all the  
their style - I hope it is all the same  
keeping - bringing up along, as money  
perhaps -

With all love

Yours  
Anna

I am thinking if I return I will  
of the St. Catherine's - also - about 17  
to of like a pair of robes - because  
with rest as I think - not sure of my  
common over location - cannot make  
the other all 10 to as 15 to

I will like the  
selecting articles in our  
I have 1 - 2 - there for  
and it - have also -  
you think is no one -  
(type no 3)
