Dearest Bernard,

I believe there have been great discussions about lengthening the session & the governors seemed to think that all they had to do was to say ^{thus it shall be} *prosa* highly disapproves, & thinks a summer session to take up some of the subjects that overcrowd the year, & make a distinction between mere pass students & honor ones - In any case the subject evoked a series of orations, from Johnson, Boney, Coe, etc - Finally the matter was relegated to committees & the October meeting I was told that Breckinridge

sent a letter to the app. to say
stating the intention of accepting
the lesson & that no applica-
tion for increased salary wd
be entertained. I don't hear
much on these matters, as I
am very little away from
home, & certainly wd not ask
for information.

By the way I have a very
full & handsome quantity for
you, mostly catalogues, but
some scientific papers wd you
like any of these forwarded
to you. I sent two off yesterday
one in a seal & the other
child brought it - refer to it from
the letter box - I had got it
at once; before I was
ready to take it - does. I do
not represent the care usually
taken of your postal matter.
I enclose a bill for the bus, &c.

which if seems to me I see spots & hairs
found - also a request - from I would be
a list of Test - books & the work in the
revision - I have not heard a word from
Louise - but - would not a letter
I might - not - be to leave -

Also I another went - at yesterday to the
with Harriet, I attend the R. S. meeting,
another was very interesting to go to
also, I received, I got ready -

but last evening the weather was
in the hospital with specimens - they
I see has several on 32 cases in the day
& in - I only lost 2 of them - I hope to be as
unfamiliar record
receives withology

ordered, as he was going to the society - the
Lovers & believe them - off to a picnic at 7.30
aboard - which time the two little Demons
& a third appeared to me - (As I was I have
gone a trip to Altona, but I will leave the
paraglets all day, no doubt - A heavy
shower predicted the pleasant week,
at 10th - I could be sure in sleeping with
a watching ear - I came in sleeping -
otherwise harmony has prevailed - of the
day is now half over - Conrad went
out to look for a survey of 1000 words
the Macken 500 of which was his own - I had
Canoes - which have been left mounted &
in large on particular by Harry Beck
after dinner of it - books has shown
I will read them for a while on the
Mackenzie they are to have tea in the parlour
of the mother's house -
