

293. University St.
Montreal.

June 22/94

Dear Bernard,

June 7th
arrived yesterday. I do

not wonder at your
anxiety. Every thing has

however been done
as far as possible. Anna

is settled with Eric at
Coonrad's, Maplewood
Farm, Elizabethtown N.J.

in quarters where the
telegraphs are satisfactory

The children arrived
safely at Metz, and

are well. We leave to
join them to-morrow

Morning, and with
God's blessing I hope
all will go well.

Museum matters
are looking up. I men-
tioned Mrs Redpath's gift
of \$1000 and the govern-
ment to purchase
Lantieri at £30. Mrs
Molau has authorized
us to keep the \$600 of
balance on Curry's salary,
and Mr Molau has
added \$500 to his
grant for specimens.
Out of this last he
will I have no doubt

be glad to pay for any
reasonable amt of Minerals
you may purchase.

If you have time,
will you kindly procure
at any Mineral or Nat
Hist dealer 3 doz of
round glop - tipped boxes,
of the smallest size
and shallow - say
about an inch in diameter
and $\frac{1}{4}$ inch deep. These
small sizes are needed
in the museum; but this
is of little consequence
unless quite convenient.

We hear of a pre-
paration for invalids
— "Benger's Self-digesting
Food" — which might
be useful for Eric. Whether
it can be got here I have
not been able to learn.
It is sold at the Army
and Navy Stores London.
If you meet with it
you might bring out with
you a few tins, and
I shall get Dyer to inspect
it for sale if I can. It
would also I think suit
Grandma's trouble about she
has been suffering from
in the heat.

I am yours
Wm Dalrymple
