

If not in time, remail
to Elizabethtown, Essex Co
N. Y.

From Sir Wm D.
to B. J. H.
1894

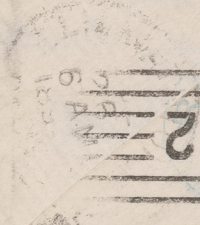

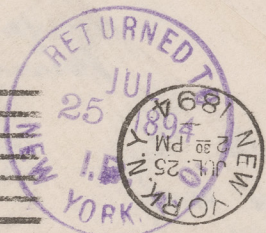

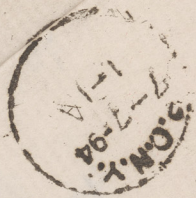

DO NOT POST AGAIN
IN THIS ENVELOPE OR WRAPPER

NOT ON BOARD
TOO LATE.

Dr B. J. Harrington, F. S. S.
(Passenger in Cunard SS
from Liverpool June 30)

Care of Agent
Cunard S. S. Co
Kindly deliver as
soon as possible

New York

Birkenshaw,
Little Metis.

July 5/94

Dear Dr Hamington,

Your (as I suppose) cable
2) Inherent Command^r arrived
on Saturday last, and
Anna informs us she
has also had a cable.
So I suppose she will write
to you from Courads,
Maplewood Farm, ~~Thera~~^{Thera}
Beth town, Mex Co N. Y.,
I meet you in New York.
At latest accounts here,
your hel, matters were
the same, and she

Seemed

disappointed to find so
little improvement in
Eric; but the time has
been short and the
weather somewhat too
warm, which has been
the case over the whole
Continent.

Here at Metz the
children are well, and
things going on in their
usual way. We have
had very unsettled weather,
but it is now fine.

If, as I suppose when
you go direct from New
York to Chrobethtown via

Westport as Lake chaplain,
there is nothing that I
know of to prevent your
staying over for a time.
In any case we can
telegraph if there is any
need of your being here.

I regret very much
that your stay in England
has been shortened; but
I can easily understand
your feeling in the
matter; and your wish
to be at hand. As for
Eric, my impression is
that his system is generally
discredited, and that

He will require time and
the most favourable
Circumstances. But for
the great distance and
his need of his Mother's
Care, he might have
gone west; and of he
can recruit a little this
might be best for the
autumn. If there is
a Medical Man at
Charlestown, having experience
in the cases of disease,
benefited by going there,
it might be well to
consult him, now that
he has had a little ex-
perience of the change of
Climate.

Wishing you a good Passage
and with kind regards from wife
& self.

Ever yours

M. D. W. W.
