

E. J. Conrad. Maple Wood Farm  
Elizabeth town  
July 5<sup>th</sup> / 94

Dearest W -

This is a bare draught  
at a venture, as I can  
have no assurance that it  
will meet you - but you  
must - have had a very  
uncertain voyage, & I cannot  
imagine how sure that you  
had received the first letter  
I wrote you from here -

I think we are as well  
placed as we can be within  
neighbourhood. It has been  
intensely hot far quite to  
sleep after we came, but that  
has been universal over the  
country - which was not  
remediable to Eric, but I see  
no improvement in him, &  
the more I think of it - the  
more entirely I am dissatisfied

with the proceedings of our  
medical advisers, however,  
we wish to remember their  
personal kindness, & I want  
to have some further advice  
from some one who really  
understands lung troubles  
& has looked into them -  
There is at Saranac a Dr  
Freeman, who has charge of a  
Sanitarium there & who is  
in constant communication  
with Dr Laornis & other U.S.  
doctors who are supposed to  
be authorities; as far as I can  
make out - Dr Stewart (the  
one with Dr Sterling) is the only  
person in Montreal who has  
sent patients to him - he is a  
man who came here himself  
in a bad condition with con-  
sumption & has been active &  
well since - I don't wish  
to suggest your staying over  
in N.Y. to make inquiries, for  
you cannot be more anxious

to come on than I am to have & very best if there  
is any opportunity, as you seem to want - but  
I make any inquiries - however I may  
come to hand here - but any time previous  
to a report, his inquiry that, make them  
any thing, & the observations are over  
here - Westport is & our station, & a  
short run up I think a day to Bay Mills  
town, where they will report & on the  
a capital rig to this place about two miles  
further up - I can telegraph in time  
for several hundred & I will. you at  
Westport - I can get no information  
as to the probable arrival of several  
times, I put in when as to whether you  
left - but as I have no sailing day so cannot  
palestate with any certainty. I have been  
why you up but so late in afternoon that &

if you had better climb on the case.

I have told Mrs B. you are

on your way out; & hence he received a

brief letter from her since. I have

written you a long letter containing & was

it to Montreal thinking that was your

route - but kept sealed & paper

inherent - enclosed " paper having left - but was

in town & not - trouble the post - but

the record seemed explicit -  
forcibly was

Anna
