

Saranac Lake
Nov. 7th / 94

Dearest -

I wrote a note to Dr T.
this morning asking him to call
& I have been in expecting him -
but hear that this is one of his
consulting days, so I suppose it
may be tomorrow before he comes
I thought he had better come here
& give me his unalloyed attention
Eric has received letter today &
I wd like him seen at his best
I had a note from Laura ~~arr.~~
concerning a preparation of beef - I
have often heard of - I did not
say Eric was tired of beef & I
only wish he had the chance in
stead of this watery soup. It is
difficult to get things down here
without being, where gas are
not wanted, & the cook is un-
skilful, or I might subsidize her
Lancaster I have Wyeth's & Johnson's
beef preparations & the "Peptinoids"
recommended by Trudeau - all
of which he takes at times =

I have finished a bottle of tonic
ordered by Nurse wh. I thought
did 2 - harm, too harsh. Iron
strychnin & leucinin - he has eaten
better the two days since he
has had none.

I have been inquiring abt.
trains, & as far as I can learn
Blattsburg, is the only every-
you leave here at 2^o - reach
there between 5-9^o - & wait $\frac{1}{2}$ an
hour, then reach Mont. at 9.30
a very tiresome journey, & in
wretched cars to Blattsburg -
the only train for here leaves
Mont. at 2.30 reaching here abt
6^o - & here they tell me you have
to leave Montreal the night before
that - must be a mistake, there
must be some morning train
that will reach Blattsburg by
fare 2.30 = They tell say that
there is no connection by the N.Y.
central abt. Colerue - & hours
to wait over =

I think you will have to
plan to come a/c. for if we go
home the journey is terrible
for me, alone with Eric, & if
we do not - of course it will be
a great pleasure & comfort
I do believe that we c^d make
good a sitting out place on Grand Union

not as here, for the price of no weeks ahead, or
perhaps on mother's little gallery: Regis drawing
is easy there: I hope you will not tell any more
outside of the family that there is a prospect of my
coming home soon, a few weeks of incognito, and
be of great value to you: I cannot be taken
up with vicissitudes, unless they come to show me
otherwise must me a very kind letter, and a very
repart of you all except Clare, who all things
looked nearly: I do not wish to see you,
we feel when asked you to have this for a short
period - very 2 months, the spring is lovely in England,
the change we see the people: What I will want
like to know, is if you or we need to wait. I should
not like to see you and your need to take a week or
more. I believe in small doses to begin with
too. I hope you will be well.
The day has been beautiful, but as always
I believe such greatly need the consolation
that - winter was likely to be very good &
need on our "horse".

The doctor's was a promising, do not seem to take you
charge - or keep you in bed, only come when you
need; he has dearly & cares this way he all regret
but if they w^d look up & keep the eye on the
particular - w^d be more comfortable. I know in a
very few weeks he will be well that they do know
in accord & I feel that more might be done for
Doe's relief, as I feel that more might be done for
etc - he has several times been able with at
his stomach, between the two & an operation
enough. But I do not think you will have
that, when you can't help that. I hope D's
will turn up tomorrow - I think he has been
having a run up at the hospital when
he had about month - D's voice has been gone
& returning very slowly, last night, was seen at
by 8 of his patients on a high = concerning them
for particular will. He was well with both &
in accord with a number of the best of the best & with the
officers - but they reminded of this morning in investigation
was well, but no one knows who had been out of the city
office
