Nov. 26th/94

Dearest B -

I discovered last night - that careless Peter, had not fastened my letter to paper on Saturday, I did not write to you for I had neglected to acknowledge - several things sent by him, I had only time for an letter, I fear you will think me as not in good case - But though I still have my cold, I think it is marking itself off - & if you have sent the pills they will probably help, I think there were some in the medicine cupboard.

The weather here continues merely gloomy, the occasional gleams, or hints of sunshine making us feel more the clouds than the sun - surely this must soon be over & the sunshine here.

Dr Bennettson came in yesterday for a short-visit - & I am going to send the Graphic to him in future instead of home

as the whole Sanitarium will
benefit, he will put it in
the reading room when he
& his house have finished, I
hope you won't mind, but our
puls so much for these lonely
young people, very few over
30 - Also I am going to give
\$.40 to the library they are try-
ing to raise enough to get mag-
azines for next year & those who
read seem loath to give, of
course many ^{would} give more
but they might give a little.

I went to see Mrs Seybold
very stout - I think, his father
is in Mr Baath, of Ottawa, a
hardware merchant, I think,
Do you know anything of him
or the Seybolds - Evidently they
are very wealthy, I have 54
times, & kindly welcome for
various lonely p.s here. Dr
Kewitson & Dr Baldwin ap-
parently drop in often, I
will try & take Eric over some
fine N. W. It will be such a
change.

I conclude that baby has
had a photo from various hints
I have received, Do let me hear

me, as soon as you can I should wait - for times & seasons - I have no photo of you either if you show me 'never is' with Wally's.

We had our children from a his career yesterday & necessarily in haste, who was most interesting, I teaching in the greatness of his faith, I humility, & persistence in labor not able to relinquish the exercise, as not being a hypocrite killed, but it seems almost if with a noble is willing to work, they might well say, he has apparently been working away by taking English & took going on with his mission.

I was badly sick also not go, but he did not feel very bright - I don't like to urge him to any extent - I of course don't not know there was to be our speech in the pulpit.

I was greeted above however about your ideas - What are religious practices? Why do we do them?

If you let yourself in for too many things, you will find it hard as a chattering thing, - ~~to say~~ ^{to say} indeed I confess also that, is to acquire a very complete

needs of the fallibility of man, & multiplicity of his
weaknesses - I have no official - doctors but give the
same relief - from distressing patients - therefore
the confess, in our strength, & a fairer trial in our
small medical paper - I also hope these sweet
no more of the fashion: For no treatment as man
with it - or must it - wears it they rest. So the attack
seem to you but severe =. I think I have been a
great - pleasure to see you here; but I am
very afraid of the need of it - taking cold & other
that they may have is of some value to the
Cherry's head been made recently, so far nothing
to his particular, but as far as I can make out
there is some objection, as to the use, at least
on the regular visit - no one here seems to know
definitely about it.

By Miss Baber has had a - night - I think a
small kind of fever was at the first; but soon an
of 15 - or 20 days - so she had a fever when she
also the fever coming - as for colds as they are
little more about these; there is no fever in the
the best - soon in the house for a week or two
of lady's
