

Maple Wood Farm
Aug 22 94

Dearest B -

Not - 24 hours since you
left, but already it seems a long
time. The weather is perfect &
Eric seems bright - this morning
talks of going to take the potatoes
by the river, or esp. on the
road. A party of ladies appear-
ed this morning intent upon
ascending Garnet - Well a good
many gave out - I have settled
in the maple wood - after pur-
chasing maple sugar - how two
or three have appeared trium-
phant upon the top.

Miss Hall is a sister of
Isaac Hall - who was for some
years in the Bryant College &
according to her account - she showed
some of the curious inscriptions

on the Cyprus discoveries, also is a
writer on Biblical matters - I
or has been connected with the
seminary of Auburn (Theol.) paper
knows about him, I think - Mr
Fidler had a rather hot ar-
gument about women coming
on the stage somewhere the great
stage of the world, as they do -
Eric tells me today that he
is sure there is something
wrong about our cheap ther-
mometer that at the low figure
it won't rise at all unless the
heat is sufficient to draw it
up to the higher - this I wish
I had known yesterday, but
certainly I wd like one that
cd be depended upon - I think
you had better let us have
yours it came quite well by
mail, & it is important to
have a correct record you have
one at all -

Our Governor tells us that the Governor Down
here is kept off his all winter & that last year
there were about 60 people there, that is winter
ingraving into & I shall do so -

I am sure they will be allowed to
stay & exercise himself as much as he can
to keep him getting in a carriage as convenient
is not good - he wants exercise, & I don't see any
reason he should not take it - in moderation -
I hope he is having rest - water baths & if the weather
is warm he might - have his legs bathed &
dry them in the sun, that is not harder upon his
muscles -

I am regarding no comparison as to
how far back sheets - for if you lay
meat - tea, there is no saying either you could
get there - do be careful of your dog &
don't lay violins & musicals that you can
help. I do be sure you take all the milk
can, some plenty of cream for your

I should - do remember that without your
leave I go to do all, the "psychology" of
poet - in our home, & I have tried to be
best, though I have not - proved it - very - all
more of I can to do when matters "depend"
do not - all - the thing best it - is of no conse-
quence, they are quite too much to do for
this need occurs, in that regard, & we
neverly have had reason to feel sure now
if I to know their part for I his reverse
& not only for a place in this life.

I shall wait - as usual - to hear
how matters seem by I tell me, how
they all look, I was also especially
No it is to all, dear heart -
I am
Anna
