

72
I don't
worry about
the dear little child
I also very busy
to watch over him
but we can do
no more. I don't
feel more easy of
you could do nothing
in an attack, I
in the circumstances
being called on
do what - my wife
and do properly.
It is unusual
that one to leave
I don't not believe
to 19 Essex
I hope you see what
our eye
longy am

letters from your lady
ways of the I am sorry
cases I am sorry the
were left I told Nellie to
take them all away & to
use what she could. I
am sorry about Nellie.
I wish I could find out
who the young man was
unless a cousin of Lizzie's
I don't know. I know
there was some interest
in the mind, but with so
many other greater
thoughts I did not
search into it. I don't
will make me doubtful
about assuming the
responsibility in all
places I can have a
clear view of what it

means, & is likely to lead to.

I have written to Scraggie for a little piece more of muslin to match some bur & told him to send to Mary J - please explain to her.

I had letters from mother tonight - giving some account of her doings. H. had had a gun-metal cigar case with 1896 set in diamonds across the corner - sent to him by Lady Shaftesbury - & an antique silver tray with legs - from Lord Ardillon: the second letter was all sympathy about Popsy - I was sorry she & papa took it - so much to heart, when so many other interests were pressing.

Also a note from Dr B. he says Mrs B. has been quite ill & their summer plans all postponed in consequence. He thought I'd explain to keep quite

appreciably to Dr. H. - I say, MacKintosh is
in debt in July - I think it - could be
me & if you had a moment - to call on Dr. H.
I feel we left - in a curl - kind of every
without - farewell. Who knew how to
business staying night, & a business
blame all day - the brother's yell the
been anchored as - the price - this a. n. &
con - late H. to give the news - but they
ed not - would tell this evening today's
rough see - they had a business party
only about - one hour - I hope that after
the flag to in to cheer, & the second party
shanty will be the way -
class is very well - about a century
has been only out of us - I do think

Concluded we know well about a
subject - a new vessel the
to a very great improvement on the
old one. The French in front is apt to
burst - but Cook says the new one has
revised sides & no weak - He says his is a
sheaf on account of a leak - press up
fast - has the vessels - an improvement on
having references it - the old is
new & as something in that way - He is
a well-impair.

Why is getting amazingly cheap &
active as ever it - looking under too - in
light - very quickly last night; & well that
at night - He turned when enough to
sing me out - I am I believe well for a
whole today - no talking of course
