your letter this A.M. I  
so glad to hear you  
arrived safely, I am  
doing well, I did not  
quit you many for  
daily steiners, I fear  
for a cooking book -  
but if you can get  
salmon & eggs, I darling  
you will do very  
well - I think with  
great pleasure of you  
being with the boys -  
like this - it really is  
worth parting, I only

wish <sup>we</sup> ~~you~~ could be in  
some quiet place every  
year where we could have  
the gymnasts to our-  
selves -

Maar Carfy is in a  
very critical condition  
I really thought she was  
dying last night & sent  
for Dr Deeks (Dr K. was  
away) to see her, he said  
if there was not a de-  
cided improvement today  
she wd not last long  
& gave her a hypodermic  
of Strychnine - & another  
this a.m. - It is her  
heart which threatens  
to fail, & course affecting  
the lungs - She is better  
this morning, & she may  
recover but Dr D. sees  
with a heart in that

state she might die violently, at  
any time. The answer is this, even  
at night I never leave the curtain  
I buy steel rods by day the other  
: Shineroy - so I only go in between  
times - I hope to read the children  
I really don't think I'm another  
second building to day the same  
so I suppose that is perhaps  
well as the car. I can't  
rather like a ~~little~~ a  
they as the head I wish they  
well as the car as I can

My brother was in yesterday  
wanting to know if we had had  
as any kind of books

best rights was the  
same in fact as how the  
my brother we received them  
in the library? gave them  
to someone - he felt the  
great must - but history is quite  
lost - I remember that one of

When I went to sleep without a  
blanket I went out with me  
gave you jacket for all Anna
