Montreal

Dearest Bernard -

I hope that all goes well with you & the boys we have had no news since the first letter, but realize that the housework accidents for a good deal - we had quite a cold days Sat & Friday, I hope you had not - Today it has threatened rain which did not come down till about time for church to be dismissed when it descended in torrents.

I hope the 4 girls who went to church drove home - I have been all morning with Mrs Carpenter - I still waiting for the doctor, as I want to see what further arrangements can be made for Mr. Glad's still too ill to be left alone & Mrs & girl cannot come this week. Dr. Deeks says it is her heart - which threatens to quit labour & she can sleep little, takes no solid food - If she does not improve in a day or two, I shall think we

unlikely to pull through =
but there I do not know much
about these things - In any
case I shall still hope to dis-
patch the children on Friday
with the two maids & I start
who is to settle mother's house.
& In & another hope to leave
Tuesday - I & Ruth also with
Carry presents me =

Ruth went to Wash
Saturday & he wants to see her
again - next Saturday he says
there is no growth but con-
siderable catarrhal condition
at the back of the nose, but
the cold "snarks" the condition
so that he cannot give a
very clear opinion = I shudder
in the presence of these medical
people, they know so much &
yet know so little that I
cannot have a settled faith
in them, & yet the physician
me = = She has also to get
those two teeth out - so that
I shall be glad when the work
is over, she has taken her
exams pretty quietly & there
are still two days of them

anything, unless a human
good lives in the service &
fear of God.

It is the one thing I
constantly pray for all the
children - & yet - we never
speak of it -

I hope you are not
finding any real troubles
in your girly life - & it
is an indescribable comfort
to me to feel the boys are
having such a healthy
happy chance of working
with you & your husband
them & gaining their col-
lectible.

The 3 servants have
shocking colds & I only hope
the children will not
begin another.

Love,

Anna
