

Love to the girls
~~and~~ youngsters
who I trust are
now absorbed
from the Great
"Quinine" -

Little Lutes
June 17th/99

I hope this will
be the last letter I shall
write, I rather fancy you
will receive it - at the
same time as the one that
I posted yesterday, as the
Sunday comes between -
Glorious weather today
& we have forgotten the
names of the two last -
The children bathed today
including Poppie, who has
been very anxious to go in,
he is very brave about it
& unless Lefleur disapproves
I think he might go on, when
the weather is favourable
next week I shall have

to begin the lessons, I try
I get the work for the
morning paper fitted in.
Bernard is the only one to
whom it is of importance
except as a duty & a self-
restraint.

I shall be glad to feel
exams are over for a time
at least & will be most
thankful if Cor has done
well - I hope he will have
a good summer & do some
thing with his photography
if you can manage abt.
the camera - I suppose you
never did anything abt
the bicycle.

Whatever may be the
eventual loss, do try &
have that Braille lesson
with Hyde or some other
tough person accustomed
to such matters, I remem-
ber your warning as to a
long holiday - We really can

that - agreed any more weak claims in
the family - when paper is unavoidable
& I see never so surprised to see meeting
colleges - well - fees will not hurt
us here, as he said at Sp. College: "if you
are allowed to the list - we may add we
are so together - I do not think my
business had changed any more if I were
a constant ~~student~~ - Law has not
out - a graphic will also be given to
the Government - we have not seen
it yet, as Bernard has it - to assist
on the way from the U. S.; I don't know
whether these will be useful to assist
this week's letters directly here, if so we
ought get it tomorrow, assist &

I don't think two of us should have
died the natural beams were the way
of as they did not have any thing
I don't think it matters much. This was
a merely here thing in fact however
I do be surprised if it laborer again
and I hope the pretty little book being
well - Bees are the - called are one
mother's are small - beautiful though some
have been taken - It is a shame
will you please send a copy of brother
Francis's with us my heart wishes in that
room with us. have her papers come:
perhaps to assist every day - I feel very
sorry for his death, if you have a chance give her
kind message - Affly - Anna
