

The chairs
needed are the
ones with high
backs & cane seats

Little Notes

June 13th 1900

Dearest B -

I fear you think we
have not written much, but
we have never let more than
one day pass without a line
& unless my letter was late
for posting, or some child
may have put it into the
box at the door, I cannot
account for the long silence
you complain of. Nellie
seems all right again now
but I was quite uncon-
fortable about her. The
severe pain kept up so
long - I kept her from sleeping
or resting - I shall have to
see to her taking care for
some time, to prevent a relapse

renew of such a state of things

I don't know what to say
about the french - I wd like to
know the scheme, & the expense -
if it wd put our children at
a decided advantage next year
I suppose they will have to chime
in - but otherwise I wd cer-
tainly prefer Eva left out.

Luis has retted down to giving
Hoffen a daily lesson, & Eva
writes so much, & reads so
much on her own account
as methodically as possible.

I have not quite decided as
to B. G. yet, he has had "a
plenty" of exercise since being
here of various kinds, & sets
down to read to himself in the
intervals like any other con-
tented old gentleman, & if I
cd only have a quiet sum-
mer he wd do well, still the

other boys will be good for him too. At last
Hoffen and - fishing yesterday, & that was your
first time though I was glad to get the whole
mass safely back - they were more in the
news as - I returned about 7 of -

I hope you are comfortable at - 295, now
has much of a remark on the subject as
total one about - Mrs. Stail, as Kate, as anything
I hope that is not - nevertheless - its whole giving
ing all of Saturday aft. seemed rather fine
the hot weather - I am so sorry for all
them - our work - every thing with on you
My first - night to have like the others, I
hope you will have all your flowers & say
with - energies in the district of supply and
I want for you - Buckleing into our feet to
I refuse to go on with they wish as well
suffered - I accept the humble, money & time

given they will have to be forthcoming. We
preferable road, cannot do all the detail
work as well as the planning & directing
& we will send the quantities down, &
keep them as reserves that for them we are
convinced we have perfect guide - at present we
should be a little of the variety of trial &
confidence in the ground - also go to head
as road are alternative while he may
find difficulty in arranging.

Therefore ought to be nearly here
I understand that large number here
over some hours of letters in the presence
of the west & send to the Dept. of R. - about
half course of course the what R. - may be
able to do and going to know that - as they
direct. - have books better I think it is better
about a little more - but will all for

she is finishing a box of powder,
Dr B's prescription. I sh^d think
she wd not require more here
she has salt water in the
bath, I think she might
try bathing next week some
fine warm day, a dip or
two I acct. I see if it agrees
with her, it is about 4 years
since she has bathed more
than once or twice. I am
having the dress - makes her
construct a bathing dress
for her. it was one of the
things not finished at home.

Tuekey has never reappeared
I have had to get old Thomas
to see to the W.C. I believe he
wd do it regularly at no
larger a price. I did not like
to change without yr. consent
I believe Mother means to do
so. I it wd be done regularly.
This old fellow does more
a day than Tuekey does all
summer, in his shop I say
I try always cost quite a
small sum - I am sorry that

Mrs F. K. has appropriated Miss
her house is still growing,
she has a large ice-house, much
better built - than her house
& of better material. & all the
foundations ^{of the mansion} banked up
with stones & earth & padded
which gives quite an air.
The Ballerils have done ditto,
but still the children say
our cottage is the prettiest
of all - A few new things
we greatly improve but if
you could send the two chairs
they really are needed, the
black ones look barred in
among the others, & bed room
ones are needed. They can be
had new at Hamiltons or
Coushys if less trouble than
the home ones - & cost about
45 or 50 cts each - Still do
not feel obliged to get them if
you are very hurried, we can
always manage - one may
guess the study rug looks better
than I had hoped after several
treatments of sew. & salt & pain-
ful brooming - Lovingly Anne
