

Anacanda, June 19/03.

Dear Dr. Harrington:-

Yours of the 7th inst. should have been answered before this, but we have had a round of gaiety here of late that has interfered. The whole McGill Colony in this district is sorry that you have decided to take the European trip instead of visiting the West this summer. No doubt Conrad will appreciate the ocean trip.

I have read the circular in regard to the proposed McGill Union. The idea is a good one & if properly carried out should result in great benefit to the students. Please put my name down on the list of subscribers to the fund at Two Hundred Dollars (\$200.⁰⁰).

We are teasing Harry Hamilton on account of a strange coincidence. It seems that about the time he left Pueblo to come here some real estate agent of the same name decamped from Pueblo & was supposed to have come here. The result was that the sheriff & chief of Police interviewed Harry here & got a description

of him. Fortunately for him the man
wanted is six feet high.

We are breaking all records in smelting ore
& producing copper at this plant.

The President of the Company has shown
his appreciation of this by giving me a
nice talk & a 50% increase in
salary.

All these and kind regards & best wishes
for a pleasant voyage.

Yours truly,
E. P. Mathewson
