

Little Notes
June 13th 1904

Dear B =

I enclose the key
as to B. S. - I wonder if he
told the Aruprior people that
he was having the 15th =

I am sorry about
the money matters, as I had
hoped that perhaps you w^d
find them a little better,
not worse, than you thought.
However I still think
that it w^d be wiser to
sell your stocks - as I have
6 or 700.00 of capital not
invested it w^d be much
better surely to transfer
your stock to my account
rather than to part with
it - unless you c^d do so to
some uncommon advantage

I had expected Clara to send
me my Merchants' bank
book - which she was to
have made up for me, she
has not understood that
I wanted it, please have
it sent at once by mail
or the children, & I will
see what I can do to help
out. I don't think I have
anything on hand, in the
way of interest, but my
capital may as well go as
yours, & is uninvested -
As soon as I get my book
I will send you \$100.00
& I think you will have
to speak to Mrs M - about
the other things - The harbor
bonds you cannot turn into
money yet - & in any case
it ought to go into the Mon-
real Bank account - to
replace money spent -

Kath is working
diligently & remodeling
the old nursery, & making
improvements some of which

were much needed - I think I will now
age to get the matters before her, & it was
not fit to refer upon - as well as being
hardly stained -

was already begun to look
better. I intended to write to Miss Fairfax
about the Quilimetic - I Miss Fairfax comes
back is - well she all right - I think, but
Miss Fairfax is evidently a little account
the color here, but - am showing Miss
I enclose her I think to Miss Fairfax
will - you might - well is - about is over I
did Miss Fairfax has the tea, & hope that the
except - has shey arrived, if you remember
there was some traces about it - last time
I hope that - have since have a little more
& persons of mind when you have -

Let me know if you do not get
the money sufficiently, for we must
let up on the bank & economy here, since
we very early see prices high: & the family
strong on eating - We have no labor yet
but we go on fuel - we work
very promising, & is well pleased - has
very said also was economical, so we
hope so = We are trying to get
the bank that we may water the
amounts less all right - the
very much & succeed in the
withering = Yachey. Much
ones - over the front - feet
services places = The
on very well
