Acc. 1070

Prof. J. Harrington.

Geological Survey of Canada,

Montreal

EDWARD SCHULTZE.

Perth, Ont., Aug. 14 1873.

Dear Sir.

I have this day sent per Express to your Address a few Specimens.

Although the appearance of these pieces vary very much yet they all come from one opening.

The time for purchasing this Mine will expire in the beginning of next Month.

I am therefore anxious to ascertain whether it contains anything worth while.

I should feel very gratefull if you would analyse any one of these Specimens, at your earliest leisure

I am told that Dr. Girdwood
did analyze some of these
same specimens, which
yielded some $\frac{1}{20}$ silver
& $\frac{1}{10}$ gold for ton. I consider
this result very doubtful

Yours

Dear Sir,

Yours very Respectfully
Ed Schultz

Harrington.
Geological Survey;
Montreal.
