

New Haven. Conn.

June 22. 1875.

My dear Mr. Harrington.

So good a Botanist as you
are need not be in any
doubt about *Cyrtopodium*
aristatum.

I am thankful for the
specimen - I had it only
from Maine before, and
your specimen is very
nicely preserved.

I have one excellent

student in Botany now, Mr.
Kleeberger of our Senior Class,
but the Juniors have not
taken hold of the subject
with much interest as yet.

Mrs Eaton reciprocates
your kind regards -

We are not likely to
visit Montreal this year,
but hope to, someday.

Yours very truly

J. C. Eaton.
