Philadelphia Jan'y 29th 1876

Prof. O. D. Allen.

My dear Sir.

Prof. Brush informed me that some very interesting prisms of pyroxene had been found in Canada and stated that you had procured one from the collector. Do you think that he would be willing to exchange one for such minerals as I might be enabled to send him from among my duplicates? If he cares for minerals in general I think that I could make an arrangement with him that would be satisfactory. Do you know where real cryptomorphite can be obtained?

Yours very truly
Clarence S. Bement.
