

Philadelphia
13th May 76.

My dear Dr Harrington.

Your letter and note of 8th May are rec^d - also the copy of the report. It looks well & I have no change to suggest - I hope the binder will not clip any more of them so closely. There are I see three shades of paper very noticeable when you examine the cut edges - but not so much so in the pages themselves. I have not been able to get any late information whatever about the Chaudiere gold field. Lockwood if he has returned from England might be able to give some.

I am promised by Mr. Walker a full account of their Plumbago mine and exhibit which is very fine. - I am going down to Washington this afternoon with Dr. Hatcher but we shall be back on Tuesday at

latest. When you get the copies of the
Report it would be as well to send
a lot down here for distribution.

The Exhibition continues to improve in
appearance daily. No news yet of
the pyramid. See later

Yours sincerely

Alfred R. Schuyler

D. B. S. Harrington.
Montreal.

Please ask Dr. Yvank to see the
enclosed & say that a copy of the
Rep.^s will be sent when they are distributed.
