Amherst, N.S. Jan 11/77

Dear Sir,

I should like very much
 some representative specimens
 of the Rocks and Minerals of
 the Geological systems below
 the Carboniferous and am re-
 commended by a friend on
 the Geological Survey Staff
 to address you on this subject.

I feel exceedingly desirous
 in doing so as I am con-
 scious of no claim upon the
 Survey entitling me to the favor
 you do I for a moment pre-

for any but should you find
it possible to oblige me with
a few specimens calculated
to be of use in studying the
 Petrology and Mineralogy
of the Olden rocks I would
regard it as a very great
favor and hold myself ob-
liged in readiness to discharge
any bundle services in my power
whenever the breiter might require
of me I am dear Sir

Very faithfully yours
Albert S. Hall
