Dear Harrington,
I would have returned many thanks to you for your valuable and interesting paper, several weeks ago. Had it not been for my many pressing engagements in

Dec 8/77

Wilkins
Three to four hours' work
on Saturday, you will
readily understand that
I have very little time
to spare.

In the College
Museum I lately found
a piece of so-called Ligite
surrounded by Pyrite in
a ^{reddish} granite or granitelle
rock. As the mineral
behaved to the blowpipe
exactly like pitchblende
I concluded that it
had been ~~wrongly~~ named
and I have re-named it.

relation to the almost
superhuman quantity
and quality of work
which I am compelled
to do, more than
this being impossible.

The twenty-four wholly
different Grammar School
and University classes I
am called upon to look
after exhaust my time
from eight till six,
including the usual noon
hour, and ~~where~~^{since} this
is repeated daily with

Pitch-blende. It is from the original
Richardson mine. If you have not a
specimen I will try and procure one
for you. I trust that you received
the Examination Papers safely. I
am sorry, on my former
appearance my best and again
to inform you by your paper,
I remain

Yours faithfully
Dr. J. Hammond
