

New Haven - Ct. Dec. 18th
- 1877.

Dear Mr. Harrington,

I wish very much
that I could follow your
suggestion and spend a week of
the winter's vacation in Montreal.

I should much enjoy it, and I
ought to thank you for suggesting so
pleasant a plan. I cannot,
however, carry it out at this time,
which I very much regret - May
we not hope to see you here

in the course of the winter.

You must have a very interesting series of rocks to work upon, and I should be very glad of an opportunity to examine them in detail -

The absence of the argentic constituents is certainly surprising, and very unlike our rocks here.

I return with this yours two slides and also enclose a slide of our East Rock trap, which please keep for comparison if it interests you.

Thanking you again for your kind invitation -

Sincerely yours

E. S. Dana
