

Feb 1878

W. Rotbeck
New York

Price of Indigo

New York July 8th 1878.

Mr. B. J. Harrington
Geological Survey of Canada
Montreal.

Dear Sir,

In answer to your esteemed favor
of the 5th instant we are very sorry to hear that the
caustic Potash you received from us is not pure and
therefore of no use to you. We shall not charge it
to you and will send another quality if you wish
it per Express or with the next order you send us.

Very respectfully yours,
W. J. Robinson & Co.

M. B. There is very little demand for molybdenite in
New York, we even have a large quantity from 5 years
back on hand yet. We think it will bring from 40-65
Cents per lb.
