My Dear Dr Harrington

When in attendance on Monday I purposed to have called on you on Tuesday but was obliged to come home on account of the Company being ab.

There are two works in London, which make Sulphuric acid. The one is known as the Canada Chemical Company G. H. Smellman, Manager London. The other is owned by an English Co. known I think as the Western of Canada Oil & Lands Co. Mr. Edwards, Manager. His initials I do not know, but the address given above should reach him.

These gentlemen will no doubt
give you all particulars.

I shall feel obliged if
you will send any one to
me who may be enquiring
about the purchase of Bluffs.
As I have a good deal of
time which I could devote
in that direction.

Who is then to be in Paris
whom I could get to direct
enquiries to me, I mean who
may want to have to do with
Canadian minerals?

Yours truly
A. C. Corran
