

Robert McDougall

New York - Nov 4/82

Dear Dr. Harrington

I am obliged for the analysis of the Putton and Brome ores - The large percentage of Titanic Acid deprives them of any value for reduction by the agency of charcoal

I have not the slightest

objection to your publishing
notes regarding our works, and
if I can be of any service
in supplying figures to I
will cheerfully do so

Many thanks for
the paper on charcoal

Sincerely yours

Robert Dougall
