Capetown, Dec. 12th 1883.
Shurbricke

My dear Dr. Sturminster,

I have picked out some samples of the ore you require, which will be forwarded by express tomorrow. They are principally from the lower ^{Crown mine} workings now at a depth of nine hundred feet on dip of vein.

I shall always be glad to send specimens or give information when required.

I leave for Springhill N.S. tomorrow where I am now interested in a new Colliery.

Believe me,

Very sincerely yours
Robert G. Leckie.
