My dear Sir -

By the Steamer I am sending a parcel to Wells Fargo of my. Also will forward it to you, all charges paid. The specimens, boring from the Canal. Chipping of agate &c. are for the Museum of "old McGill". I trust that they will interest you. The figures on boring refer to depth from the surface.

My friend Mr. Ritchie of the Gazette, to whom I am writing by this Mail, will send you the parcel, it is the counterpart of yours. General specimen of agate he has had it for a few days, it will be presented to the Nat. Hist. Socy. My Brother Dr. Geo. Nelson & G, have quite a lot of specimens to send later. Skull Petrified wood. Rock Crystal &c.

I have put notes in all the Earthquake &c. that have taken place since I have been here, with a faithful compilation of them, make a suitable paper for any of the Societies of Canada. An answer will be deemed a favor, when time permits.

With very kind regards to Dr. Dawson and self - Believe me,  
Faithfully Yours  
W. Harrington.      Volfred Nelson.
