

March 13 - 1884

Prof Harrington.
McGill College.
Montreal. Canada.

Dear Sir:-

I take the liberty
of writing you
in regard to the
thin crystal of
Pyroboelite, that
you so kindly
showed me when
I called on you
in 1882 - The
crystal I believe

for. F. Knorr
March 13th 1887

Your note has made you
an offer for - I
beg to inquire if you
care to sell it, and
if so at what price?
I think you can
do as well now
as any time, and
I will pay any
price within reason
for it. I believe
at the time you
said something
about a small specimen
of Bytownite you
was to let me have?

as I then said. I
would like a piece
no matter how
small. trusting

that you will
inform me as
to the Raynolite
and Bytownite.

I send you a copy
of my American
Gems. Very truly yours.
George F. Kunz,
