School of Mines, Columbia College,

CORNER 49TH STREET & 4TH AVENUE,

New York, April 9th 1884.

Prof. Harrington,

My Dear Sir:—

I have had occasion within the last two or three days to examine the nickelite which is found in considerable quantities at Tilt Cove, Newfoundland. I have found some very interesting things relating to it which I wish to investigate. Can you not tell me how I can get 100 pounds or more of it?

Yours Truly,
W. A. Egerton
