

Committee on Invitations and Receptions.

Philadelphia Meeting

American Association for the Advancement of Science,

September, 1884.

Chairman, Dr. William Pepper.

Secretary, Dr. Persifer Frazer.

August 9. 1884.

Prof. Haverington, B.A., Ph.D.
McGill College, Montreal.

Dear Prof.

I should have answered you much long ago but that a press of work has kept me in a state between dreaming and swimming. We can meet glad to learn that you are coming to our meeting and shall try to see that you can make comfortable. As for tenability the time of year at which professional men can meet precludes all except rural populations from being at home to open their houses. Speaking of this subject reminds me that I have a strong pressure (both internal and external) urging me to go to Montreal for at least a part of your meeting. I wish Dr Hunt a month or more ago had of there was any possibility of finding hotel accommodation

and his sister in this subject
in his last letter looks minor
of them be any chance of
acquiring a room within easy access
of the place I mention in a letter.

I think I should come.

I think you kindly let me

know about this.

Yours very sincerely

Wm. F. Foy

201 South 5th St. Phila.
