

March 31 / 83-

J. H. Williams

Baltimore.

Johns Hopkins University.

Baltimore, Mch 31st 1885

Professor B. Sturtevant.

My dear Sir

Permit me to most cordially thank you for your kind note and the copy of your most interesting paper both of which reached me safely today. Your contributions to the subject of paramorphism and pseudomorphism of pyroxene to hornblende I have read with much profit and shall make good use of in future.

With sincere regard believe me
very truly yours Geo. A. Williams
